Forka People

Every screen of the current demo, for the designer. Desktop and phone, English and Arabic samples. 12 November 2026.

How to read this

- **What it is:** the working demo of Forka People (made-up people and numbers). Every screen works; the look is what needs designing.
- **Keep:** the Forka brand (charcoal #2B2B2B, paper #F6F3EE, bronze #8C6A3F; accents sea #3D7C8C, saffron #E3A33B, sage #7C9A7E, terracotta #C8553D), EB Garamond headings, Inter Tight text, IBM Plex Sans Arabic. No emojis: line icons only.
- **Every screen** must work in English and Arabic (right to left), on desktop and on a phone (most staff use phones). 12 more staff languages are machine translated, so text lengths vary.
- **Roles:** what you see depends on who signs in (staff, manager, HR, payroll, CEO). "Who sees it" under each title says who uses the screen.
- **Direction so far:** the home dashboard (screens 02 and 03) follows the concept Khaled approved (dark sidebar, warm hero with the teamwork illustration, quick actions, latest updates). The rest still uses the earlier look.
